

EPIC Semi Hydraulic Bending Machines

Standard Pan brake features:

- 150mm Maximum opening height.
- High grade steel clamping fingers, located on a machined dovetail.

Optional features:

- One piece with high tensile steel inserted clamping system.

3 Station electronics

Folder features:

- High tensile steel one-piece folder blade.

Standard Features:

- 4Kw motor
- Standard EPIC Electronic 3 station control system.
- Hydraulic apron (Bending beam)
- Manual operated clamping mechanism.
- Large well engineered bearings, bushes and mechanical mechanisms with proper grease nipples for easy and quick lubrication.
- Removable sturdy angle line support attached to the machines apron.
- Fully adjustable for different material thicknesses.
- Manual adjustable clamp type backstop.
- European hydraulic systems.
- General good grade steel used for manufacture.
- High tensile steel used for apron blade

Optional features:

- Hydraulically operated hand valve taking away any need for electrical control system (Cost affective)
- Bar on bed and Apron blade segmented and removable.
- TDF bed slots
- Others options available on request
- Hand wheel operated back gauge

Apron only bending Machines are available in:

- 1240mm x 2.0mm
- 1860mm x 2.0mm
- 2500mm x 2.0mm
- 3085mm x 1.6mm
- 3710mm x 1.6mm
- 4020mm x 1.6mm
